AA31 paymaster deposit too low

The first 20 bytes of thepaymasterAndData field specify the address of the paymaster contract you are requesting to use.

The paymaster contract does not have enough funds deposited into the EntryPoint contract to cover the required prefund of the user operation.

Possible solutions

- Verify that thepaymasterAndData
- field is correct, and that the first 20 bytes are the address of the paymaster contract you intend to use.
- If you are using your own paymaster contract, deposit more funds into the EntryPoint contract through thedeposit()
- function of the paymaster contract.
- If you are using a paymaster service like Pimlico,reach out to them
- .
