

Bridging

To participate in Velocore, new users should ensure they have ETH on Linea to cover transaction/gas fees.

Assets can be bridged to Linea via the [Linea Bridge](#) or the [Velocore Spaceship Bridge](#).

Additionally, the [Velocore Spaceship Bridge](#) allows users to bridge various ERC-20 tokens to Linea mainnet.

The Velocore Spaceship Bridge, a bridging interface for native Linea mainnet assets, is developed with the technical support of the Linea Foundation

Please note that bridging services can take between 20 to 30 minutes for asset transfer completion.
