Welcome to the Brokk November update.

These monthly updates provide information about the most important topics Brokk tackles and give an outlook on what's planned next.

November was the sign of a further downtrend of crypto thanks to the FTX collapse. The last domino hasn't fallen yet, and we're closely monitoring how it plays out. Unlike in the case of Terra, Brokk had no direct exposure as all Brokk funds are held in self-custody multisig wallets.

November TL;DR

- Two new portfolios
- US users restriction
- Tracking Dashboard coming
- Multichain portfolios coming

Key Metrics

TVL: \$50k
