

This thread is to ask why the public post (from tor / foundation) on the forums for the Q2 2021 transparency report has been deleted. If you search you can still find the report reshared by winston [Disclosure of June 2021 OTC Event - Secret Foundation - #7 by winston](#) but the actual post that included statements from the foundation regarding the report has been removed since the OTC Scam disclosure. Because this specific report covered the time where the OTC scam was reported to have occurred I'm asking why those posts are suddenly gone?

Tagging those who worked at foundation during that time and had knowledge of these events.
