

# eth\_unsubscribe

Cancel subscriptions by calling this method with the subscription ID. It returns a boolean indicating that the subscription was canceled successfully.

For Growth and Custom service plans This JSON-RPC method allows a request to be forwarded to a partner service provider if Infura should experience a service issue or outage. See [Failover protection](#) and [Enable API request forwarding](#) for complete details.

If you would like failover protection but don't qualify under your current plan, then either self-upgrade to the Growth plan or contact a sales representative to upgrade to a Custom plan.

## Parameters

- subscription ID
- : The ID of the subscription you want to unsubscribe.

## Returns

- unsubscribed flag
- : (boolean)True
- if the subscription is canceled successfully.

## Example

Replace YOUR-API-KEY with an API key from your [Infura dashboard](#) .

WebSocket connections only Subscription methods are available for [WebSocket](#) connections only.

## Request

- WSS

```
wscat -c wss://polygon-mainnet.infura.io/ws/v3/YOUR-API-KEY -x '{"jsonrpc":"2.0","id": 1, "method": "eth_unsubscribe", "params": ["0x9cef478923ff08bf67fde6c64013158d"]}'
```

## Response

- JSON

```
{ "id": 1, "jsonrpc": "2.0", "result": true }
```
