

Hi there,

This morning I was a little bit sleepy and I wanted to subscribe for a new project on a launchpad. Usually I am really careful but this time I was at work, had to do it quite fast so I googled "Ape Terminal" and I clicked on the first result without seeing it was a "sponsored link". It sent me to a link which looks quite exactly the same as the original one.

So I connected my wallet and my tokens were stolen. I lost exactly : 24432 \$RVST (Revest Token) and 191000 KNDX (Kondux token) which are worth around 10'000

.

This is the transaction on etherscan : [tx/0x23e335994ab173d0c99e719ac17afeb2cb466b1f949e7e4e5e60aff5e526d471](https://etherscan.io/tx/0x23e335994ab173d0c99e719ac17afeb2cb466b1f949e7e4e5e60aff5e526d471)

Then by tracking the transactions of the thief, I saw that he used Lido to withdraw his money, here is the transaction with the same wallet less than one hour after stealing my tokens (and others) :

[tx/0x058e7589837f86475733c02dd60500f1a80710a6357e7d1c36e5f3598c8cfb60](https://etherscan.io/tx/0x058e7589837f86475733c02dd60500f1a80710a6357e7d1c36e5f3598c8cfb60)

This same wallet is scamming and stealing a lot of people and uses Lido to withdraw his money easily. We can't let him keep going like this. Something needs to be done to stop this guy and people like him. The image of Lido cannot be associated with a "thieves paradise".

I hope you will understand my point here.

Best regards.
