

We want to give a big shoutout to Josef

([@svendaj](#)) for his fantastic work creating and maintaining [his Kaggle notebooks for Numerai](#)!

Josef's notebooks have been a huge asset to the community, and we know they've helped people get started or improve their approaches.

In order to show our appreciation for Josef's efforts, we've sent him a bounty of 50 NMR

. We hope this encourages him to keep up the great work

This is also a call to action for all of you in the community!

We're always looking for high-quality contributions that can benefit everyone. Whether it's creating new notebooks, improving existing ones, or sharing insightful discussions, we value your participation. So don't be shy - share your knowledge and help us all grow together!

Here are some ways you can contribute:

- Create new Kaggle notebooks that tackle interesting problems in the Numerai dataset.
- Improve existing notebooks by adding new functionalities, fixing errors, or making them more user-friendly.
- Share you insights and learnings in the forum discussions.

Let's keep this community a vibrant hub for learning and collaboration!

Joe (on behalf of the Numerai Council of Elders)

Bonus fact:

Josef also kindly agreed to give a presentation about his notebooks at the recent Frankfurt meetup. Do check out the slides and videos at [our meetup repo](#).
