

eth_gasPrice

Returns the current gas price in wei.

For Growth and Custom service plans This JSON-RPC method allows a request to be forwarded to a partner service provider if Infura should experience a service issue or outage. See [Failover protection](#) and [Enable API request forwarding](#) for complete details.

If you would like failover protection but don't qualify under your current plan, then either self-upgrade to the Growth plan or contact a sales representative to upgrade to a Custom plan.

Parameters

None.

Returns

A hexadecimal equivalent of an integer representing the current gas price in wei.

Example

Replace YOUR-API-KEY with an API key from your [Infura dashboard](#).
