

Ahh...no that's not what that means at all if I understand what you are asking. There is no passive income/compounding of NMR just holding it. The price of the token (in fiat terms) could go up like any crypto asset, but it could go down as well. In either case your 100 NMR would stay 100 NMR. The 46% refers to returns from STAKING ON MODELS, which essentially means making predictions and then betting on them. (and you would need to do coding and data science stuff for that).
