

LCD Proxy

Proxy API for making LCD requests to BlockChain Node

[GET][POST]

/v1/:network/lcd/*

You can directly access the Node LCD API by referring to the Swagger or document of the Network you want to make requests to. However, please note that certain requests are blocked as they may have a negative impact on the server.

Request

Headers Authorization :

Bearer {access_token} Parameters

The name of network

(string, required)

network :

cosmos

The url of lcd API. See details in Swagger or document of the network

(string, required)

* : /cosmos/bank/v1beta1/balances/cosmos1clpqr4nrk4khgkxj78fcwwh6dl3uw4ep4tgu9q
