

No. If you have a positive score, you will get a payout on it. And consequently, if you have a negative score, you will lose some of your stake. (There are now a few different options for which total score you want to be evaluated on though: CORR, CORR+MMC, CORR+MMC/2, or CORR+MMC*2). There are no cutoffs for ranking, and no bonuses for being ranked highly (there used to be, so you may find old references to that). Rank is no longer involved in payouts at all.
