

Hello Secret Network community,

I was looking for an information regarding the SWAP but I didn't find it, maybe I didn't search enough!

I learnt few days ago that Enigma has been renamed Secret Network and that a new token SCRT has been created to replace the current ENG.

I read a lot that the SWAP will be a 1 for 1, but I'm quite skeptical... currently 1 ENG worth 0,0000528 BTC and 0,00000076 (on Yobit, the only exchange I found with SCRT). Which is a quite huge difference... !

So my question is, how the SWAP can be 1 for 1 ? Will I have after the SWAP 1 ENG and 1 SCRT or just 1 SCRT with the deletion of the 1 ENG ?

Many thanks for the enlightenment,

Have a great evening

Nicolas
