

We're excited to announce that Kent is joining our team as a Special Projects Engineer starting in July 2024. He will be assisting in research for long-term improvement of the network.

As a contributor to Secret, Kent will be working on:

1. Software projects that utilize Secret Network's technology stack
2. Focusing on initiatives to scale our network and improve its performance
3. Maintaining node health through testing, optimization, and monitoring
4. Scoping and addressing developers' pain points, working closely with our engineering team to improve our documentation, SDKs, and APIs.

Kent's expertise and dedication will be invaluable as we continue to grow and innovate. Please join us in welcoming Kent to the team!

We look forward to Kent's positive impact at Secret Network Foundation.
