

Requesting supported Chains

Find out which chains we currently support. The complete API documentation for our/chains endpoint can be found [here](#) . We are constantly adding new chains to our ecosystem to enable more and more token transfers.

To get a list of all chains that are currently supported, the/chains endpoint can be queried:

...

```
Copy const getChains = async () => { // chainTypes can be of type SVM and EVM, by default, only EVM chains will be returned
const optionalChainTypes = "EVM"
const result = await axios.get('https://li.quest/v1/chains', { params: { chainTypes: optionalChainType } });
return result.data; }
```

...

The result contains a list of chains that looks the following:

...

```
Copy { "chains": [ { "id": 1, "key": "eth", "name": "Ethereum", "chainType": "EVM", "coin": "ETH", "mainnet": true,
"logoURI": "https://raw.githubusercontent.com/lifinance/types/main/src/assets/icons/chains/ethereum.png",
"tokenlistUrl": "https://gateway.ipfs.io/ipns/tokens.uniswap.org",
"multicallAddress": "0x5BA1e12693Dc8F9c48aAD8770482f4739bEeD696", "metamask": { // this information is required to add
the chain to your MetaMask wallet "chainId": "0x1", "blockExplorerUrls": [ "https://etherscan.io/" ], "chainName": "Ethereum
Mainnet", "nativeCurrency": { "name": "ETH", "symbol": "ETH", "decimals": 18 }, "rpcUrls": [
