

Orca for Liquidity Providers

With the brand new Liquidity Terminal now available for LPs to use there are a lot of new features to get to grips with. Please see the Liquidity Terminal Navigation Charts for insights into the new tools and features.

Orca's concentrated liquidity (CLAMM) pools continue to offer liquidity providers advanced ways of operating, that were previously impossible on an AMM, and now with the arrival of Liquidity Terminal, LPs have never had it so good.

Concentrated liquidity pools, are an advanced tool that can replace, and surpass, traditional order-books, but research and learning should be engaged with before diving in.

With fully permissionless pool creation anyone can [create a pool](#) on Orca.
