

Setting up a node/validator

Everything that you need to setup a validator from picking the right hardware to getting a validator up and running. This section covers the hardware setup, as well as setting up a node for mainnet or testnet and creating a validator if needed.

Got questions or need help with setting up?

- You can find help in Telegram [here](#)
- Visit the Secret Network Discord [here](#)
- and ask in #node-discussion or #node-support for help *
