## **The dYdX DAO Playbook**

A guide to building the future of dYdX governance.

As a reminder, the dYdX Operations subDAO was formed with a goal to support the growth of a community-run dYdX DAO. As part of this goal, we have written a playbook to guide the community through the formation and governance of subDAOs. The playbook covers background information, governance procedures, operational best practices, legal frameworks, and the risks of subDAOs.

We are opening up this thread to feedback and comments on the playbook. We also plan on hosting a few different events, including an AMA, to go over the content and feedback.

We're also aware that the dYdX DAO could migrate to a cosmos-based chain in line with the v4 migration. The document may be updated with cosmos governance procedures and operations processes to match the new environment.

Enjoy the read!
