

Hey Everyone!

I'm very excited that for the first time this season, my voting power has ended up above the 0.5% threshold has a delegate! For that reason I have decided to start this delegate communication thread.

For simpler votes, I have used the "vote with reason" feature and you should be able to see all of the reasoning behind my votes in the Agora UI [here](#).

Below I will outline my reasoning for the votes where I didn't use the "vote with reason" feature, and for all future votes where the discussion is more complicated.

For Season 4 mission proposal requests, my main questions in my voting logic were quite simple:

- Is the team the correct team to lead this mission on a skills/community level?
- Is the mission directly contributing to the rise of Ether's Phoenix?
- Is this proposal a good faith attempt to improve the Collective, as opposed to a bad-faith attempt to grab governance funds?
- Does the requested amount of OP seem reasonable given the scope of the mission?

All of my votes needed to answer "yes" on all 4 of these questions. I tried to lean towards giving the benefit of the doubt on these proposals in the case that I was on the fence on one of the questions.

My votes for Season 4 mission proposals were as follows:

Intent #1:

- Proposal 3B: Velodrome: Spread Awareness Through Direct Outreach and Onboarding
- Proposal 3D: Create and Maintain the 'Optimism Vision Reservoir'
- Proposal 3E: Optimistic Womxn Shinning in Blockchain
- Proposal 3F: Let's take the Optimistic Vision to LATAM with Espacio Cripto
- Proposal 3G: Spread Optimistic values across Latam with Solow
- Proposal 3I: 'Thank Optimism - powered by ThriveCoin'
- Proposal 3J: Web3xplorer - A curated web platform to discover useful web3 apps, resources and tools,
- Proposal 3K: Rumbo Optimista - Hacia Ethereum Mexico The Event || Optimistic Road in the way to Ethereum México

Intent #3:

- Proposal 1A: Superchain Governance Deepdive
- Proposal 1B: Fully Decentralized and Independent Oracle and Data Infrastructure
- Proposal 1C: TechNERD Program
- Proposal 1D: Extend the L1Block contract to store historical blockhash data
- Proposal 1E: Future-proofing UI/UX of OP nodes
- Proposal 1F: Spearbit + Immunefi Bug Bounty Program for Large Protocols on Optimism

Intent #4:

- Proposal 4B: The RetroPGF Podcast ***
- Proposal 4C: Delegate Corner Podcast
- Proposal 4E: Improving Governance Accessibility through Praise and Contribution Based Attestations
- Proposal 4F: Pairwise: Tinder UX For Web3 Community Signaling
- Proposal 4I: Velodrome: Fostering Inclusive Governance through Leading Optimism Builders and Long-term Users
- Proposal 4K: OP Governance Analytics Dashboard
- Proposal 4L: [OPdelegate.com](https://opdelegate.com) ***

- Proposal 4M: NumbaNERD Program

*** These two proposals I am the alliance lead on. Due to the approval-based voting and having no way to abstain, my interpretation was that it is OK to vote in favor of my own proposals. That said, I only had ~60k votes at the time and to be honest didn't give this too much thought. Now that I have much more voting power, I will be sure to be more careful about votes like this in the future and solicit community feedback for any gray areas.
