

# ERC721ProxySafe

## Derives

- [ImmutableOwner](#)

## Functions

### constructor

function

constructor ( address \_immutableOwner )

public

#### Parameters:

Name	Type	Description
_immutableOwner	address	

### func\_60iHVgK

function

func\_60iHVgK ( address

from , address to , uint256

, uint256 tokenId , contract

IERC721 token )

external Proxy transfer method forIERC721.transferFrom . Selector must matchIERC20.transferFrom . Note thatamount is unused for security reasons to prevent unintended ERC-721 token sale via partial fill

#### Parameters:

Name	Type	Description
from	address	address to address `` uint256 tokenId uint256 token contract IERC721
