

Hello,

The purpose of this conversation is to introduce a template for the dYdX governance process. The main idea is to harmonize the governance topics and establish a pattern for each proposal, making them easier to comprehend for the participants in the governance process.

Title of Proposal:

[Insert Title Here]

Authors:

[Insert Name of the Author]

Summary:

[Insert a brief summary of the proposal]

Background:

[Insert a brief background on the parameter being changed, its current value, and the reason for the proposed change]

Objective:

[Insert the objective of the proposal]

Proposal Details:

- Parameter: [Insert the parameter being changed]
- Current Value: [Insert the current value of the parameter]
- Proposed Value: [Insert the proposed value of the parameter]
- Rationale: [Insert the rationale for the proposed change, including any relevant technical or economic considerations]

Impact Assessment:

- Technical Impact: [Insert the potential technical impact of the proposed change, including any potential risks or benefits]
- Economic Impact: [Insert the potential economic impact of the proposed change, including any potential costs or benefits]
- Social Impact: [Insert the potential social impact of the proposed change, including any potential benefits or risks to stakeholders]

Voting:

Voting on this proposal means...

By voting YES

on this proposal, you agree that...

By voting NO

on this proposal, you disagree that ...

By voting NO WITH VETO

, you disagree with the overall proposal.

By voting ABSTAIN

, you decline to give an opinion on this proposal.

Conclusion:

[Insert a concluding statement summarizing the proposal and its potential impact]

Depending on the type of governance proposal, certain parameters may not be relevant. For example, a proposal to create a DAO constitution would not have any significant technical or economic impact, but it would have a social impact.
