

Updates

Executives

- In June Dewiz provided support to the following executives:
- Crafter role for the Out-of-Schedule [June 16th](#) executive which we delivered in a timely manner. Crafter role for the [June 28th](#) executive.
- Reviewer role for [June 14th](#) and also crafter role on the same executive for the RWA015 onboarding code.
- Crafter role for the Out-of-Schedule [June 16th](#) executive which we delivered in a timely manner. Crafter role for the [June 28th](#) executive.
- Reviewer role for [June 14th](#) and also crafter role on the same executive for the RWA015 onboarding code.

Endgame work stream:

- The Endgame Yield Farms modules and the SubDAO token contract were all sent for auditing. We are awaiting the final audit report soon.

Collateral onboarding:

- Andromeda:
- The Pilot Deployment was finalized [successfully](#) on time for the USDP PSM and debt ceiling increase change to be included in the June 28th executive.
- The vault operator

was trained on how to execute the push

and wipe

calls, which were the final steps for the Pilot Deployment.

- A new training session took place in order to train the vault operator

on how to draw Dai and push

it to the crypto broker.

- MultiSwapConduits have been successfully peer reviewed and external audited by [@pulluplabs](#) and ChainSecurity respectively. We thank both teams for a timely delivery and such a great collaboration. The plan is to deploy the new MultiSwap conduit into the July 12th Executive, which will allow operator

to use any PSM at will.
