

Get test tokens

Test funds are available to developer so that they can test their smart contracts and applications within the confines of a test network. This page covers how to get test funds from a local testnet.

Before we begin, you must have a local testnet running. Follow the [Run a local network guide](#) if you haven't got a local testnet set up yet.

```
1. Change directory to where you created thelotus
2. andlotus-miner
3. binaries. If you followed theRun a local network guide
4. these binaries will be in~/lotus-devnet
5. \
6. ""
7. Copy
8. cd~/lotus-devnet
9. ""
10. View the wallets available on this node withlotus wallet list
11. \
12. ""
13. Copy
14. ./lotuswalletlist
15. ""
16. This command will output something like:\
17. ""
18. Copy
19. Address Balance Nonce Default
20. t1snly7vh4mjtjznwze56ihrdhzwfbajywwmrenq 0 FIL 0
21. t3q4o7gkwe7p7xokhgws4rwntj7yqfhpj5pm6cqc7dycl7cwk4uvgh2odwdvge5re7ne5gcc6xluifss5uu5cq 49999999.999763880085417692 FIL 2 X
22. ""
23. Create the send request withlotus send
24. , supplying the pre-minedt3q4o...
25. address as the--from
26. address, the newt1snl...
27. address as the receiving address, and the amount of FIL we want to send:\
28. ""
29. Copy
30. ./lotussend--from
31. ""
32. For example:\
33. ""
34. Copy
35. ./lotussend--
    fromt3q4o7gkwe7p7xokhgws4rwntj7yqfhpj5pm6cqc7dycl7cwk4uvgh2odwdvge5re7ne5gcc6xluifss5uu5cqt1snly7vh4mjtjznwze56ihrdhzwfbajywwmrenq2000
36. ""
37. This command will output something like:\
38. ""
39. Copy
40. bafy2bzaceaazbgiazwvtpago6wpkxl42puxfkvvw5cwjptime2irqatamji2bq
41. ""
42. Check the balance of your newt1snl...
43. address withlotus wallet balance
44. \
45. ""
46. Copy
47. ./lotuswalletbalance
48. ""
49. For example:\
50. ""
51. Copy
52. ./lotuswalletbalancet1snly7vh4mjtjznwze56ihrdhzwfbajywwmrenq
53. ""
54. This command will output something like:\
55. ""
56. Copy
57. 2000 FIL
58. ""
59.
```

If you want to manage your local testnet tokens in MetaMask you will need to create at4 address. You can create at4 address usinglotus wallet new dealeated . Once you have at4 address you can connect MetaMask to your local testnet to see the new balance within the MetaMask extension.
