

Hey guys I really need help with this one ! it's been a while that when I copy any wallet address or contract and paste it, a specific address will be pasted instead of what I have copied ! And this happens on all of my browsers (Brave - Chrome - Firefox)

this is the address 0x81daa515b9b2584a52b5ad78140a751bb698635a (the address which is not mine but it's been messing with me)

any suggestion ?
