

My staked ETH is missing. I stake 0.1 ETH using Swell Staked Ether. Now my ETH reduced to 0.0011.

All I have a Transaction Hash from EigenLayer: Strategy Manager which is Queue Withdrawal. I didn't do this tx. When I checked Transaction no money transfer in that transaction or after that I can see. This has happened 65 days ago and because of I didn't noticed early my Eigen points is minimal, got 10 Eigen plus I lost 0.1 ETH + gas fee.

Queue of withdrawal tx has is:

<https://etherscan.io/tx/0x3121db3afe0d1768a0f03e7a6fd71caebb665982a6052205583e228f96f7829f>

As I stated before, If you check my transaction no token movement occurred. Don't know where my ETH. Please help me. Thanks.
