

In addition to our ongoing token delegation program, today a16z crypto is identifying the wallets from which we will be directly voting on select Optimism governance proposals going forward.

As a reminder, we have previously delegated to a wide set of Optimism delegates. Today we have 17 Optimism delegates and we are always looking for more delegates with the right qualities. More info on our delegates and their on-chain voting activity can be found [here](#).

Going forward, we may also vote directly on select, strategic proposals. To do so, we will initially use the below two wallets, which collectively possess ~10M OP of voting power.

1. 0xf11B6a8c3CB8bb7dbC1518A613b10CEb0BBfc06b
