

Installing SFA iOS SDK

Swift Package Manager

Add the SFA iOS SDK to your project

1. In Xcode, with your app project open, navigate to **File > Add Packages**
2. .
3. When prompted, add the tKey iOS SDK repository:
4. <https://github.com/Web3Auth/single-factor-auth-swift>
5. From the **Dependency Rule**
6. dropdown, select **Exact Version**
7. and enter **2.0.3**
8. as the version.
9. When finished, Xcode will automatically begin resolving and downloading your dependencies in the background.

Cocoapods

`pod 'SingleFactorAuth', '~> 2.0.3'` [Edit this page](#) [Previous](#) [Web3Auth Core Kit Single Factor Auth iOS SDK](#) [Next](#) [Initialize](#)
