

Welcome to Filecoin Docs

Filecoin is a peer-to-peer network that allows anyone to store and retrieve data on the internet. Built-in economic incentives ensure that files are stored and retrieved reliably and continuously.

This is the new Filecoin documentation site, hosted by [GitBook](#).

This site [docs.filecoin.io](#) will continue to be updated, while [legacy-docs.filecoin.io](#) will serve as a historical entity only and will receive no further updates. DNS for the legacy site will be removed on 2023-09-30. However, copies of the site may remain available [over IPFS](#).

[Checkout the Filecoin blog for more information → ?](#)

Choose your own adventure

[#### \[\(https://docs.filecoin.io/#learn-the-basics\)\]](#) [Learn the basics](#) Want to understand the fundamental concepts of Filecoin where to start? The Basics section is the perfect place to begin your journey!
