

Hello. I am proposing that moderators stop censoring proposals / ideas simply because they run counter to the interests of UniSwap legacy investors. I have tried to post a proposal "Reduce / Remove Team & Investor Allocations" – which is a legitimate topic worth discussing. The proposal was promptly censored by moderators. I am therefore proposing Freedom of Speech in this governance forum. Attaching Screenshots of the previously censored Post.

Hoping that admins do the right thing here and not Ban my Account.

Thank you everyone
