The number of deaths is more than 40K and is increasing day by day unfortunately

There was 70% destruction in 10 cities affected by the earthquake.

The whole world is helping Turkey right now, from the countries to singers or company are donating to Turkey to relieve the damage after the catastrophic earthquake.

We had planned to transfer the donation from UniswapDAO to the Ahbap foundation first (as in our forum or temperature check, [Uniswap DAO helps Turkiye earthquake](#)), but the Turkish fiscal authority asked them to close their accounts and move the money to the bank.

Also, after the authority has allowed to crypto donations, a multisig has been established last week, named Anka relief. They will direct all the funds raised to legitimate and trusted NGOs that address multiple humanitarian needs.

Vitalik Buterin also has chosen Anka Relief multisig to donate.
