

Motivation

The word transaction comes with a lot of context from blockchains. We don't really mean to bring this context to Taiga, it might be confusing for both blockchainers and taigers. At the same time calling both structures "partial transaction" might be confusing because they are not the same structure in the current taiga terminology and are not always partial

Ideas

1. arrangement (partial arrangement)
 2. composition (partial composition)
 3. transition (partial transition)
 4. agreement (partial agreement)
 5. alignment (partial alignment)
 6. accordance (partial accordance)
 7. harmony
- (partial harmony)
