

# Introduction

Welcome to Orca: Solana's apex liquidity layer.

Orca (<https://www.orca.so>) is an advanced protocol built around a Concentrated Liquidity Automated Market Maker (CLAMM). If you want to know more you can dive into [Orca: find out more](#) - or explore documents tailored to your interests (see links below).

If you're feeling chatty swim over to the [Discord community pages](#) to engage with fellow podmates, or to ask a friendly Community Manager for support.
