

Hey guys, I recently opened a PR on the Zapper Studio GitHub so the staked xFOLD balances are also accounted for in their app.

PR : <https://github.com/Zapper-fi/studio/pull/1328> (can't post links)

This shouldn't require any maintenance from the team unless the staking contract is modified.

If in the future there is a claim

contract/function implemented in order to claim staking rewards, that can also be added on Zapper to be visible.

The PR has been validated in Discord chat with one of their devs and should be merged september 2nd.

As per Sam Bacha in Telegram suggested, I made this post to submit my work for a community grant

ETH ENS : clonescody.eth

Thanks guys, happy to be on board
