

## Introduction:

We are proposing an upgrade to our platform: the deployment of GMX V2 on BASE. Alongside this, we would love to have COIN stock listed to diversify our offerings and cater to the increasing demand from our community.

## Proposal Details:

### Deployment of GMX V2 on BASE:

This move is in line with our strategic goals to improve the user experience, increase our platform's availability, and stay competitive in the ever-evolving decentralized landscape.

### Listing COIN Stock:

By introducing COIN stock to our platform, we aim to tap into the growing interest in traditional equities within the crypto community. This also represents a bridge between traditional finance and decentralized finance, enhancing our platform's attractiveness to a broader audience.
