

The vibe check / vote from the community for Aave V3 was overwhelmingly positive as seen in the following snapshot [vote](#) . As indicated in the initial introductory [thread](#) there will be a few more snapshot votes for the community to define the V3 launch strategy. This request for comments is for the community to discuss the licensing for the Aave V3 code. It is up to the community to determine which licensing regime is appropriate for Aave V3. The licenses proposed here will be collected and voted on by the community through a specific snapshot vote.
