

# Limit vs. RFQ Orders

The Limit Order Protocol provides users with options to place both Limit orders and Request For Quote (RFQ) orders. Select the appropriate order type based on your specific needs.

## Comparison Table

Criteria	Limit Order	RFQ Order
Suitable for Traders	Yes	Yes
Market Makers	Yes	Yes
Flexibility of features	High; includes Order predicates, callbacks. <a href="#">Details</a>	Limited due to gas optimization; Supports expiration time, partial fills (once), and cancellation by ID. <a href="#">Details</a>
Execution	Uses Pathfinder algorithm for liquidity. Exposed via API; requires quote requests; optimized for one-time fills. Key Characteristics Offers at a fixed price (0 slippage); various trading features/tools can be built. Mirrors "request for quotation"; designed for market makers and gas efficiency. Both order types support ERC20, ERC721, and ERC1155 tokens. Other token standards might be supported in the future.
