

I wasn't sure where to post this question, but [according to this reporting agreement](#), Monetalis is paid to provide monthly reports on James Asset Trust 3 (aka RWA014 aka the Coinbase Custody vault).

The vault was fully drawn at 500m DAI [on May 31, 2023](#). It is now 57 days later, but I have not noticed a report like [the two monthly reports that have occurred for the Clydesdale vault in the same time period](#).

Does anyone know when a report will be posted on the status of the Coinbase Custody account? Specifically, how much USDC has been credited to the account, what the current balance is, and whether the rate is still 2.6% or has it adjusted in the current interest rate environment?
