

IPFS

The [Interplanetary File System \(IPFS\)](#) is a distributed, [peer-to-peer \(p2p\)](#) storage network used for storing and accessing files, websites, applications, and data.

Limited access Infura is currently limiting IPFS services to customers that already have an active IPFS key. New IPFS key creation is disabled for new and existing customers. Content is accessible from peer nodes located anywhere in the world. These nodes relay information, store it, or both.

To integrate your IPFS project with Infura, create an [Infura API key](#).

See also See the [IPFS documentation](#) for more information. Check out the [IPFS Quick Start docs](#) to get up and running with IPFS.
