

The LEND migration has been going on for a year now and more than 95% of the LEND supply has been migrated. The migration has now been stuck to 95.751% of the total for a long time.

Holders that didn't migrate either:

- Lost access to their funds
- Dont follow/don't care about Aave and the crypto space anymore

Why not stopping the migration, say in two months from now, and recoup the remaining AAVE to refurbish the Aave reserve? Even if half of the remaining LEND holders migrate once an end date is decided, that would still be around 75M worth of AAVE that can be used for protocol growth.

I created a snapshot vote to check the community sentiment, [Snapshot](#)
