

NonceManager

A helper contract for managing nonce of tx sender

Functions

increaseNonce

function

increaseNonce ()

external Advances nonce by one

advanceNonce

function

advanceNonce (uint8 amount)

public Advances nonce by specified amount

Parameters:

Name	Type	Description
amount	uint8	

nonceEquals

function

nonceEquals (address makerAddress , uint256 makerNonce)

external

returns

(bool) Checks ifmakerAddress has specifiedmakerNonce

Parameters:

Name	Type	Description
makerAddress	address	
makerNonce	uint256	

Return Values:

Name	Type	Description
Result	bool	True ifmakerAddress has specified nonce. Otherwise, false

Events

NonceIncreased

event

NonceIncreased (address maker , uint256 newNonce)

Parameters:

Name	Type	Description
maker	address	
newNonce	uint256
