

## What do?

Introducing the [Protect Explorer](#)! A dashboard designed to illuminate the savings Protect users are enjoying. Flashbots Protect is the original

MEV blocker for Ethereum transactions with MEV refunds and transaction revert protection. With the Protect Explorer, users and projects can quantify how much they have saved with Flashbots Protect.

The Protect Explorer features:

- Protect savings calculator

: Enter an address or ENS and check how much Protect savings you could have saved on historical transactions.
