

Title: [ARFC] Aave DAO Policy Change: Halt Listings on all Aave v1 & v2 Non Permissioned Deployments

Author: [@Llamaxyz](#), Gauntlet, Chaos Labs, 3SE Holdings & [@ItsFreeRealEstate](#)

Status: Proposed

Dated: 2022.11.26

Simple Summary

As part of the Sunsetting of v1

, the v2 → v3 Migration

& the Deprecation of v2

discussions being conducted by the community [here](#) and [here](#), the authors are appealing to the Aave DAO to adopt a policy of halting listings on the following markets:

- Aave v1 (Ethereum & Uniswap Markets)
- Aave v2 (Ethereum, AMM, Polygon & Avalanche Markets)

Abstract

With the release of Aave v3 featuring superior risk management parameters and controls, this proposal advocates only enabling future asset listings to occur on Aave v3 deployments. Upon implementation of this upgrade, via a successful Snapshot vote, assets can no longer be add/introduced to the Aave v2 deployments.

Note: The Aave ARC & Centrifuge RWA markets, which are powered by the “Permissioned” V2 codebase are not included. These liquidity pools support the latest battletested version of the “Permissioned” code base.

Motivation

This proposal seeks to begin the transition from v2 to v3 deployments. The first step in this progression is to focus our efforts on growing the v3 deployments whilst continuing to actively support the v2 deployments in all other areas. Going forward all future asset listings are to be limited to only v3 deployments.

Successful passing of this ARFC will indicate the DAO has decided that the various V3 deployments are the future of the Aave DAO, and support of the various listed markets will be limited to Risk and Critical Technical Updates.

Specification

The Aave Community upon successfully voting on Snapshot to implement this upgrade, will prevent any further assets from being added to any of the following Aave Market pools, as identified by their LendingPool Addresses.

- Ethereum V1 Market [0x398eC7346DcD622eDc5ae82352F02bE94C62d119](#)
- Ethereum V1 Uniswap Market [0x2F60C3EB259D63dcCa81fDE7Eaa216D9983D7C60](#)
- Ethereum V2 Market [0x7d2768de32b0b80b7a3454c06bdac94a69ddc7a9](#)
- Ethereum V2 AMM Market [0x7937d4799803fbbe595ed57278bc4ca21f3bffc](#)
- Polygon V2 Market [0x8dff5e27ea6b7ac08ebfdf9eb090f32ee9a30fcf](#)
- Avalanche V2 Market [0x4F01AeD16D97E3aB5ab2B501154DC9bb0F1A5A2C](#)
