

We specialize in AI-based models for vault strategies, hedging and delta-neutral yield, and risk management, AI bots. We have huge experience with making AI Tools for traders, coming from traditional markets and crypto space.

Among other things, we have created an AI platform for traders. Balance is designed for every level of your trading experience. Some tools are useful for upcoming traders, and others are perfect for professional ones. Everyone can benefit from AI-generated knowledge and professional-grade tools.

What is unique in our product is a technology called - Voice. Thanks to it, a user gets an expert voice explanation of any of his or her open positions based on technical analysis, including specific indicators.

Our mission is to build and develop a safe crypto space.

Our Sample Tools In Action:
