

In the introduction of UNI tokens, linked at <https://uniswap.org/blog/uni/>, it is stated that:

“”

In the meantime, UNI holders will have immediate ownership of:

- Uniswap governance
- UNI community treasury
- The protocol fee switch
- eth ENS
- Uniswap Default List (tokens.uniswap.eth)
- [SOCKS](#) liquidity tokens

“”

Can someone go into deeper detail about what UNI holders own specifically in regards to ‘eth ENS’ and ‘SOCKS liquidity tokens’

Thanks
