

Configure Widget

Flexibility at your fingertips LI.FI Widget supports default chains and tokens configuration, allowing you to preselect default source and destination chains and tokens as well as destination token amount.

The example below shows how to preconfigure default chains and tokens.

...

```
Copy import{ LiFiWidget,WidgetConfig }from'@lifi/widget';
```

```
constwidgetConfig:WidgetConfig={ // set source chain to Polygon fromChain:137, // set destination chain to Optimism  
toChain:10, // set source token to USDC (Polygon) fromToken:'0x2791bca1f2de4661ed88a30c99a7a9449aa84174', // set  
source token to USDC (Optimism) toToken:'0x7f5c764cbc14f9669b88837ca1490cca17c31607', // set source token amount  
to 10 USDC (Polygon) fromAmount:10, };
```

```
exportconstWidgetPage=()=>{ return(); };
```

...

There are also allow and deny options for chains, tokens, bridges, and exchanges.

...

```
Copy import{ LiFiWidget,WidgetConfig }from'@lifi/widget';
```

```
constwidgetConfig:WidgetConfig={ // disable BSC from being shown in the chains list chains:{ deny:[56], }, // allow bridging  
through Stargate bridge only bridges:{ allow:['stargate'], }, };
```

```
exportconstWidgetPage=()=>{ return(); };
```

...

Apart from allow and deny options, the tokens option can be configured to include other tokens or featured tokens that will appear on top of the corresponding list of tokens.

...

```
Copy import{ LiFiWidget,WidgetConfig }from'@lifi/widget';
```

```
constwidgetConfig:WidgetConfig={ tokens:{ // Featured tokens will appear on top of the list featured:[ {  
address:'0x2fd6c9b869dea106730269e13113361b684f843a', symbol:'CHH', decimals:9, chainId:56, name:'Chihuahua',  
logoURI:'https://s2.coinmarketcap.com/static/img/coins/64x64/21334.png', }, ], // Include any token to the list include:[ {  
address:'0xba98c0fbebcb892f5b07a42b0febd606913ebc981', symbol:'MEH', decimals:18, chainId:1, name:'meh',  
logoURI:'https://s2.coinmarketcap.com/static/img/coins/64x64/22158.png', }, ], // To deny a token it is required to specify the  
chainId and address only deny:[ { address:'0x4200000000000000000000000000000000000000000000000000000000000000', chainId:10, }, {  
address:'0x0000000000000000000000000000000000000000000000000000000000000000', chainId:10, }, ], }, };
```

```
exportconstWidgetPage=()=>{ return(); };
```

...
