

Over the past few weeks we have received numerous messages asking about the delivery of our approved AIP-112, this is a letter to the community to let everyone know that unfortunately the delays are out of our control and we have not yet received the funding that the DAO approved 10 weeks ago.

AIP-112 was submitted Sept. 5th and passed snapshot with a 94.5% vote on Oct 26th. The lack of communication and follow-through by Cartan is extremely disappointing and has us at a stand still as the majority of the funds are going towards production costs. This delay reflects poorly on us as our entire production process has been pushed back nearly 2 months.

We understand that the holidays get busy and there has been quite a bit going internally however, it has now been 10 weeks since our AIP passed and we are still without our grant. We are asking Cartan to take immediate action to rectify this situation and fulfill the promise of service that was made to the DAO.

We are beyond excited to bring our products and ideas to life and thank everyone for their patience.
