

Gauntlet is looking into recent changes in CRV liquidity, as well as monitoring user positions for CRV.

The HF of [DeBank | The Web3 Messenger & Best Web3 Portfolio Tracker](#) is 1.64, meaning CRV needs to go to 0.37 to trigger liquidation at the moment.

With the upcoming [AIP](#), the LT is being lowered to 0.49, so the price at which a liquidation occurs is 0.415

We are looking into it and will let the community know of next steps. We welcome any thoughts from the community.
