About Us:

Argonaut is a team of highly motivated crypto enthusiasts eager to participate in governance and make meaningful improvements where we see opportunities. Our team is diverse, with expertise on DeFi analysis, smart contract development, and research.

We chose the name Argonaut to symbolize our commitment to governance across various DAOs. Like Jason's mythological crew, we bring together a range of skills and a pioneering spirit, dedicated to exploring new challenges and leading with innovation in decentralized governance.

Main Focus:

Our focus areas are security, fairness, and innovation.

Conflicts of Interest:

As a young team, we are currently active only in Arbitrum governance as delegates, but we plan to expand our involvement in other DAOs as we grow. We are committed to maintaining transparency in our decisions, with no hidden agendas.
