

Decentology DappStarter Truffle Box

This box comes with DappStarter and when unboxed will scaffold a DappStarter receipt project.

Projects come with: - Client side framework - Blockchain library - Smart Contracts - Test Blockchain Environment (Server & Accounts) - Web server service

All components are wired together and update for you out of the box for an end to end developer experience

Install

To get started simply run

```
npm truffle unbox decentology/dappstarter-trufflebox
```
