

I think there was a missed opportunity at Apefest. There could have been a tent setup where people could connect, ask questions, meet some council members IRL, and just have a visual presence for ApeCoin. Using ApeFest and other high-profile events can help move the needle in adoption.

Is this part of a comms committee to set up or a separate events team?

Conceptually this could even roll into ApeCoin having its own events and meetups.

Looking forward to hearing some ideas and discussing.
