

Hello, this is John Park(https://twitter.com/a41_john) from a validator based in Seoul called A41(a41.io).

A41 is currently running validator nodes on multiple networks including testnet nodes on Lido-Obol and Lido-SSV. And, it has been actively looking for opportunities to onboard Lido DAO in multiple ways.

A41 is interested in applying for the next Lido ETH onboarding round and wanted to make an inquiry to the DAO when the next onboarding applications will open. Also, if possible to answer, what will be the main criteria for assessment(with Shapella upgrade are there additional criteria that LNOSG wants to assess further?) and how many will be selected for the next wave?

Against the backdrop of withdrawal being enabled with Lido v2, any tentative outlines on when the next onboarding phase will be and what (additional) categories will be evaluated could help new node operators to prepare joining Lido DAO as operators.

Thank you.
